Here at Manchester Packaging Company we have the capability to provide you with quality custom plastic film; and we can print your custom logo or artwork (up to 6 colors) on the film. In addition to creating and printing the film, we have the ability to transform your custom film in to the bag you need.

EXTRUSION

We manufacture mono-layer and 3-layer co-extruded polyethylene blown film from prime FDA resins. Our computer controlled equipment assures you of repeatable quality film every order.

Let 50 years of experience guide you to the quality film you need.

Resin Types

- Liner
- High Clarity
- Linear Low
- Low Slip
- No Slip
- Frozen Food Films
- Metallocene
- Shrink Film
- USPS Poly Wrap Film

PRINTING

Our printing department uses the latest in flexographic printing technology to print your logo or artwork on blown polyethylene film.

We have the capability of printing up to 6 colors in either line or process printed designs, surface printed film, reverse printed film, surface printed bags, or reverse printed bags.

Our printing inks are blended in house using computer color matching for most applications. Our computerized ink blending process includes Pantone color match.

We use high speed stack and CI Flexo presses capable of printing 4 color line work or up to 6 color process designs.

CONVERTING

We custom manufacture printed and unprinted side seal and bottom seal bags for many packaging applications. We will make the size and construction to meet many packaging requirements.
